WASHINGTON  
1928**

## INTRODUCTION

---

This work covers the literature published from January 1 to December 31, 1925, and continues the work of the Smithsonian Institution issued as volume 55 of the Smithsonian Miscellaneous Collections, which covered the material published prior to June 30, 1909, and the work of the National Advisory Committee for Aeronautics as published in the Bibliography of Aeronautics for the years 1909 to 1916, 1917 to 1919, 1920 to 1921, 1922, 1923, and 1924.

As in the previous volumes, citations of the publications of all nations have been included in the languages in which these publications originally appeared. The arrangement is in dictionary form with author and subject entry and one alphabetical arrangement. Detail in the matter of subject reference has been omitted on account of the cost of presentation, but an attempt has been made to give sufficient cross-references to facilitate research in special lines.

JOSEPH S. AMES, *Chairman,*  
*National Advisory Committee for Aeronautics.*

MARCH 20, 1928.

## ABBREVIATIONS

Aer. Eng. Suppl. The Aeroplane.....	The Aeroplane— . . . Aeronautical Engineering Supplement to The Aeroplane, London.
Aeron, Journ.....	Aeronautical Journal, London.
Amer. Mach.....	American Machinist, New York.
Amer. Gas. Eng. Journ.....	American Gas Engineering Journal, New York.
Atti Assoc. Ital. Aerotecn.....	Atti dell' Associazione Italiana di Aerotechnica, Roma.
Aut. Eng.....	Automotive Engineering, New York.
Aut. Mot. Flugw.....	Automobil-Motorrad-Flugwesen, Berlin.
Ann. Soc. Met. France.....	Annuaire, Société Météorologique de France, Paris.
Automobile-Automotive Ind.....	The Automobile and Automotive Industries, New York.
Aviat. Aer. Eng.....	Aviation and Aeronautical Engineering, New York.
Bull. Aero-Club Suisse.....	The Bulletin, Aero Club Suisse, Berne.
Bull. Exper. Depart. Airplane Eng. Div.	The Bulletin of the Experimental Department, Airplane Engineering Division, U. S. A., Dayton, Ohio.
Bull. Soc. Enc. Ind. Nat.....	Bulletin de la Société d'Encouragement pour l'Industrie Nationale, Paris.
C. R. Acad. Sci.....	Comptes Rendus hebdomadaires des Séances de l'Académie des Sciences, Paris.
Deutsche Luftf. Zeitschr.....	Deutsche Luftfahrer Zeitschrift, Berlin.
Electr. Railw. Jour.....	Electric Railway Journal, New York.

National Advisory Committee for Aeronautics, June 9, 1925, Washington, Government Printing Office, 1925, pp. 5, ill.
- Report No. 213. A résumé of the advances in theoretical aeronautics made by Max M. Munk, by Joseph S. Ames.  
National Advisory Committee for Aeronautics, Mar. 31, 1925, Washington, Government Printing Office, 1925, pp. 46, ill.

- NATIONAL ADVISORY COMMITTEE FOR AERONAUTICS. Report No. 214. Wing spar stress charts and wing truss proportions, by Edward P. Warner.  
National Advisory Committee for Aeronautics, Nov. 2, 1925, Washington, Government Printing Office, 1925, pp. 18, diags.
- Report No. 215. Air forces, moments and damping on model of fleet airship Shenandoah, by A. F. Zahm, R. H. Smith, and F. A. Louden.  
National Advisory Committee for Aeronautics, Sept. 23, 1925, Washington, Government Printing Office, 1925, pp. 32, ill., diags., tabs.
- Report No. 216. The reduction of airplane flight test data to standard atmosphere conditions, by Walter S. Diehl and E. P. Lesley.  
National Advisory Committee for Aeronautics, Aug. 1, 1925, Washington, Government Printing Office, 1925, pp. 18, diags.
- Report No. 217. Preliminary wing model tests in the variable density wind tunnel of the National Advisory Committee for Aeronautics, by Max M. Munk.  
National Advisory Committee for Aeronautics, Nov. 18, 1925, Washington, Government Printing Office, 1925, pp. 15.
- Report No. 218. Standard atmosphere—tables and data, by Walter S. Diehl.  
National Advisory Committee for Aeronautics, Oct. 25, 1925, Washington, Government Printing office, 1926, pp. 28, tabs.
- Report No. 221. Model tests with a systematic series of 27 wing sections at full Reynolds number, by Max M. Munk and Elton W. Miller.  
National Advisory Committee for Aeronautics, Dec. 23, 1925, Washington, Government Printing Office, 1926, pp. 18, tabs., diags.
- Technical Memorandums No. 295. Hulls for large seaplanes, by Giulio Magaldi.  
National Advisory Committee for Aeronautics, Jan. 1925 (mimeographed), Washington, pp. 20, ill.  
From "La Technique Aéronautique," Oct. 15, 1924.
- Technical Memorandums No. 296. Experimental determination of pressure drop caused by wire gauze in an air stream.  
National Advisory Committee for Aeronautics, Jan. 1925 (mimeographed), Washington, pp. 9, tabs.  
From Report A 77 of the "Rijks-Studiedienst voor de Luchtvaart," reprinted from "De Ingenieur," Aug. 5, 1924.
- Technical Memorandums No. 297. Royal Aero Club light aeroplane competition, by J. S. Buchanan.  
National Advisory Committee for Aeronautics, Jan. 1925 (mimeographed), Washington, pp. 33, tabs.  
Paper read before the Royal Aeronautical Society, Oct. 30, 1925.
- Technical Memorandums No. 298. Results of recent experiments with slotted wings, by G. Lachmann.  
National Advisory Committee for Aeronautics, Jan. 1925 (mimeographed), Washington, pp. 15, ill.  
From "Zeitschrift für Flugtechnik und Motorluftschiffahrt," Aug. 26 and Sept. 26, 1924.
- Technical Memorandums No. 299. Determination of ignition points of liquid fuels under pressure, by J. Tausz and F. Schulte.  
National Advisory Committee for Aeronautics, Jan. 1925 (mimeographed), Washington, pp. 14, ill.  
From "Zeitschrift des Vereines Deutscher Ingenieure," May 31, 1924.
- Technical Memorandums No. 300. Pressure distribution on fuselage of airplane model.  
National Advisory Committee for Aeronautics, Feb. 1925 (mimeographed), Washington, pp. 15, ill., diags., tabs.  
From Report A 33 of the "Rijks-Studiedienst voor de Luchtvaart," Amsterdam, reprinted from "De Ingenieur" of Jan. 26, 1924.

- NATIONAL ADVISORY COMMITTEE FOR AERONAUTICS. Technical Memorandums No. 301. Light airplanes of France, Germany, Italy, Belgium, Holland, Czechoslovakia, and Lithuania. Compiled by the National Advisory Committee for Aeronautics.  
National Advisory Committee for Aeronautics, Feb. 1925 (Nov. 5, 1925) (mimeographed), Washington, pp. 37, ill.
- Technical Memorandums No. 302. Effect of speed on economy of airship traffic, by W. Bleistein.  
National Advisory Committee for Aeronautics, Feb. 1925 (mimeographed), Washington, pp. 55, diagrs.  
From "Zeitschrift für Flugtechnik und Motorluftschiffahrt," Oct. 23, Dec. 13 and 27, 1924.
- Technical Memorandums No. 303. Pitot-static tubes for determining the velocity of air, by H. Kumbruch.  
National Advisory Committee for Aeronautics, Feb. 1925 (mimeographed), Washington, pp. 51, ill.  
From "Forschungsarbeiten auf dem Gebiete des Ingenieurwesens," 1921, No. 240.
- Technical Memorandums No. 304. Suggestions for courses of instruction in aviation, by Professor Poeschel.  
National Advisory Committee for Aeronautics, Mar. 1925 (mimeographed), Washington, pp. 9.  
From "Luftfahrt," Dec. 5, 1924.
- Technical Memorandums No. 305. Calculation of wing spars of variable cross section and linear load, by Léon Kirste.  
National Advisory Committee for Aeronautics, Mar. 1925 (mimeographed), Washington, pp. 5, ill.  
From "L'Aéronautique," Jan. 1925.
- Technical Memorandums No. 306. Altitude of equilibrium of an airship, by Umberto Nobile.  
National Advisory Committee for Aeronautics, Mar. 1925 (mimeographed), Washington, pp. 18, diagrs.  
From "Rendiconti Tecnici," Nov. 15, 1924.
- Technical Memorandums No. 307. Preliminary investigation of the effect of a rotating cylinder in a wing, by E. B. Wolff.  
National Advisory Committee for Aeronautics, March, 1925 (mimeographed), Washington, pp. 12, ill., tabs.  
From Report A 96 of the "Rijkstudiedienst voor de Luchtvaart," Amsterdam, reprinted from "De Ingenieur," No. 49, Dec., 1924.
- Technical Memorandums No. 308. Law of similitude for the surface resistance of lacquered planes moving in a straight line through water, by Friedrich Gebers.  
National Advisory Committee for Aeronautics, April, 1925 (mimeographed), Washington, pp. 75, ill., tabs., diagrs.  
From "Schiffbau," Vol. 22, 1921. Nos. 29, 30, 31, 32, 33, 35, and 37.
- Technical Memorandums No. 309. Light aeroplane engine development, by L. F. R. Fell.  
National Advisory Committee for Aeronautics, April, 1925 (mimeographed), Washington, pp. 24, tabs.  
Paper read at a joint meeting of the Royal Aeronautical Society and of the Institution of Automobile Engineers, Feb. 19, 1925.
- Technical Memorandums No. 310. The "Magnus effect," the principle of the Flettner Rotor, by A. Betz.  
National Advisory Committee for Aeronautics, April, 1925 (mimeographed), Washington, pp. 23, ill., diagrs.  
From "Zeitschrift des Vereines deutscher Ingenieure," Jan. 3, 1925.

- NATIONAL ADVISORY COMMITTEE FOR AERONAUTICS. Technical Memorandums No. 311. The light airplane. Brief review of the results obtained in the development of light airplanes—I. Modern theoretical aerodynamics as applied to light airplane design—II, by Ivan H. Driggs.  
National Advisory Committee for Aeronautics, April, 1925 (mimeographed), Washington, pp. 30, tabs.  
Reprinted from "The Slipstream Monthly," Dec., 1924, and Jan., 1925.
- Technical Memorandums No. 313. Structural methods employed by the Schütte-Lanz Airship Company, by Chief Engineer Gentzcke of the S-L Airship Company.  
National Advisory Committee for Aeronautics, May, 1925 (mimeographed), Washington, pp. 71, ill.  
From "Zeitschrift für Flugtechnik und Motorluftschiffahrt," May 15, 1924.
- Technical Memorandums No. 314. Alloys similar to duralumin made in other countries than Germany, by K. L. Meissner.  
National Advisory Committee for Aeronautics, May, 1925 (mimeographed), Washington, pp. 7.  
From "Zeitschrift für Metallkunde," 1925.
- Technical Memorandums No. 315. The problem of fuel measurement (The Schiste "Konsummeter"); by K. R. H. Praetorius.  
National Advisory Committee for Aeronautics, May, 1925 (mimeographed), Washington, pp. 4, ill.  
From "Der Motorwagen," March 31, 1925.
- Technical Memorandums No. 316. European commercial aeronautics. Prepared for United States Army Air Service from data obtained during his inspection trip, July–September, 1924, by Lieut. J. Parker Van Zandt.  
National Advisory Committee for Aeronautics, May, 1925 (mimeographed), Washington, pp. 14, map.
- Technical Memorandums No. 317. Air forces on airfoils moving faster than sound, by J. Ackeret.  
National Advisory Committee for Aeronautics, June, 1925 (mimeographed), Washington, pp. 8, ill.  
From "Zeitschrift für Flugtechnik und Motorluftschiffahrt," Feb. 14, 1925.
- Technical Memorandums No. 318. High velocity wind tunnels (their application to ballistics, aerodynamics, and aeronautics), by E. Huguenard.  
National Advisory Committee for Aeronautics, June, 1925 (mimeographed), Washington, pp. 29, ill.  
From "La Technique Aéronautique," Nos. 37–38, Nov. 15 and Dec. 15, 1924.
- Technical Memorandums No. 319. Report on commercial air transportation activities in England, France, Germany, and Holland. Prepared for United States Army Air Service, by Lieut. J. Parker Van Zandt.  
National Advisory Committee for Aeronautics, June, 1925 (Sept. 28, 1925) (mimeographed), Washington, pp. 70, ills., tabs., map.
- Technical Memorandums No. 320. The "Navigraph," by Ives Le Prieur.  
National Advisory Committee for Aeronautics, June, 1925 (mimeographed), Washington, pp. 10, ill.  
From "L'Illustration," April 4, 1925.
- Technical Memorandums No. 321. Increasing the power of internal combustion engines, by Georg Prayer.  
National Advisory Committee for Aeronautics, July, 1925 (mimeographed), Washington, pp. 11, ills.  
From "Der Motorwagen," Sept. 30, 1924.

- NATIONAL ADVISORY COMMITTEE FOR AERONAUTICS. Technical Memorandums No. 322. Airplane parachutes, by Lieutenant Mazer.  
National Advisory Committee for Aeronautics, Aug., 1925 (mimeographed), Washington, pp. 47, ill.  
From "Bulletin Technique," Aug., 1924, of the Service Technique de l'Aéronautique, France.
- Technical Memorandums No. 323. Recent experiments at the Göttingen aerodynamic institute, by J. Ackeret.  
National Advisory Committee for Aeronautics, July, 1925 (mimeographed), Washington, pp. 21, ill.  
From "Zeitschrift für Flugtechnik und Motorluftschiffahrt," Feb. 14, 1925.
- Technical Memorandums No. 324. Relation of "Lilienthal effect" to dynamic soaring flight, by Roderich Fick.  
National Advisory Committee for Aeronautics, July, 1925 (mimeographed), Washington, pp. 14, ill.  
From "Zeitschrift für Flugtechnik und Motorluftschiffahrt," 1924, Nov. 28 and Dec. 12.
- Technical Memorandums No. 325. Computation of cantilever airplane wings, by K. Thalau.  
National Advisory Committee for Aeronautics, July, 1925 (mimeographed), Washington, pp. 21, ill.  
From "Zeitschrift für Flugtechnik und Motorluftschiffahrt," May 26, 1924.
- Technical Memorandums No. 326. The light airplane. Modern theoretical aerodynamics as applied to light airplane design, with a series of charts—III. Design of an airplane with reference to physical dimensions, component weights, and disposition of surfaces—IV. Design of an airplane with reference to balance, distribution of weights and moments—V, by Ivan H. Driggs.  
National Advisory Committee for Aeronautics, Technical Memorandums No. 326, Aug., 1925, Washington, pp. 34, ill., tabs.  
Reprinted from "The Slipstream Monthly," February, April, and July, 1925.
- Technical Memorandums No. 327. Latécoère air lines, by Lieut. J. Parker Van Zandt.  
National Advisory Committee for Aeronautics, August, 1925 (mimeographed), Washington, pp. 17, ill.  
Prepared for the U. S. Army Air Service.
- Technical Memorandums No. 328. Preliminary report on British commercial aeronautics. Prepared for United States Army Air Service by Lieut. J. Parker Van Zandt, July 8, 1924.  
National Advisory Committee for Aeronautics, Sept., 1925 (mimeographed), Washington, pp. 11. (Mailed Sept. 9, 1925.)
- Technical Memorandums No. 329. Atomization of liquid fuels, by Dr. Kuehn. Part I. Relation between atomization and combustion. Methods employed for determining the size of particles and small drops. Choice of experimental method.  
National Advisory Committee for Aeronautics, Sept., 1925 (mimeographed), Washington, pp. 31. (Mailed Sept. 11, 1925.)  
From "Der Motorwagen," July 10 and 20, 1924.
- Technical Memorandums No. 330. Atomization of liquid fuels, by Dr. R. Kuehn. Part II. Description of apparatus. Fuels tested. Atomization experiments. Discharge measurements atomization.  
National Advisory Committee for Aeronautics, Sept., 1925 (mimeographed), Washington, pp. 50, ill. Mailed Sept. 21, 1925.  
From "Der Motorwagen," Oct. 10 and 20, and Nov. 30, 1924.

- NATIONAL ADVISORY COMMITTEE FOR AERONAUTICS. Technical Memorandums No. 331. Atomization of liquid fuels, by Dr. R. Kuehn. Part III. Critical discussion of experimental results mixing the atomized fuel with air.  
National Advisory Committee for Aeronautics, Sept., 1925 (mimeographed), Washington, pp. 48, diagrs. Mailed Sept. 28, 1925.  
From "Der Motorwagen," Dec. 10, 1924, Jan. 20, and Feb. 10, 1925.
- Technical Memorandums No. 332. Concrete airship sheds at Orly, France, by Freyssinet. Part I. General aspect of the problem. Basic principles of the final project. Principal structural elements.  
National Advisory Committee for Aeronautics, Oct., 1925 (mimeographed), Washington, pp. 40, ills. Mailed Oct. 5, 1925.  
From "Le Génie Civil," Sept. 22 and 29, 1923.
- Technical Memorandums No. 333. Concrete airship sheds at Orly, France, by Freyssinet. Part II. Supporting structure and method of moving. Mechanism for moving the centering apparatus for handling the materials. Remarks on construction details.  
National Advisory Committee for Aeronautics, Oct. 1925 (mimeographed), Washington, pp. 39, ills. Mailed Oct. 8, 1925.  
From "Le Génie Civil," Sept. 29 and Oct. 6, 1923.
- Technical Memorandums No. 334. Theory of flapping flight, by Alexander Lippisch.  
National Advisory Committee for Aeronautics, Oct. 1925 (mimeographed), Washington, pp. 11, ill. Mailed Oct. 15, 1925.  
From "Flugsport," June 17, 1925.
- Technical Memorandums No. 335. Schütte-Lanz airship projects after the war, by Georg Weiss.  
National Advisory Committee for Aeronautics, Oct. 1925 (mimeographed), Washington, pp. 14, ill. Mailed Oct. 24, 1925.  
From "Schiffbau," May 27, 1925.
- Technical Memorandums No. 336. Pressure distribution on Joukowski wings, by Otto Blumenthal, and Graphic construction of Joukowski wings, by E. Trefftz.  
National Advisory Committee for Aeronautics, Oct. 1925 (mimeographed), Washington, pp. 26, ill. Mailed Oct. 31, 1925.  
From "Zeitschrift für Flugtechnik und Motorluftschiffahrt," May 31, 1913.
- Technical Memorandums No. 337. A method for the direct determination of wing-section drag, by A. Betz.  
National Advisory Committee for Aeronautics, Nov. 1925 (mimeographed), Washington, pp. 8, ill. Mailed Nov. 5, 1925.  
From "Zeitschrift für Flugtechnik und Motorluftschiffahrt," Feb. 14, 1925.
- Technical Memorandums No. 338. Recent progress in the theoretical deduction of airplane wings, by M. Panetti.  
National Advisory Committee for Aeronautics, Nov. 1925 (mimeographed), Washington, pp. 10. Mailed Nov. 19, 1925.  
From "Revista Aeronautica," July 1925.
- Technical Memorandums No. 339. Aerodynamic characteristics of aircraft with reference to their use, by M. Panetti.  
National Advisory Committee for Aeronautics, 1925 (mimeographed), Washington, pp. 12. Mailed Nov. 25, 1925.  
From "L'Ala d'Italia," April 1925.
- Technical Memorandums No. 340. An introduction to the helicopter, by Alexander Klemm.  
National Advisory Committee for Aeronautics, 1925 (mimeographed), Washington, pp. 57, ill. Mailed Dec. 4, 1925.  
From "Mechanical Engineering," Mid-November 1924.

- NATIONAL ADVISORY COMMITTEE FOR AERONAUTICS. Technical Memorandums No. 341. Strength calculations on airplanes, by A. Baumann.  
National Advisory Committee for Aeronautics, Dec. 1925 (mimeographed), Washington, pp. 23. Mailed Dec. 10, 1925.  
From "Berichte und Abhandlungen der Wissenschaftlichen Gesellschaft für Luftfahrt," July 1925.
- Technical Memorandums No. 342. Wire suspensions in wind-tunnel experiments, by Jean Kerneis.  
National Advisory Committee for Aeronautics, Dec. 1925 (mimeographed), Washington, pp. 14, ill. Mailed Dec. 17, 1925.  
From "L'Aérophile," Sept. 1-15, 1925.
- Technical Memorandums No. 343. Potential flow in engine valves, by Bruno Eck.  
National Advisory Committee for Aeronautics, Dec. 1925 (mimeographed), Washington, pp. 20, ill. Mailed Dec. 24, 1925.  
Reprint from "Zeitschrift für angewante Mathematik und Mechanik," Vol. IV, 1924.
- Technical Notes No. 211. Aircraft engine design, by E. E. Wilson.  
National Advisory Committee for Aeronautics, Jan. 1925 (mimeographed), Washington, pp. 20, ill., diagr.
- Technical Notes No. 212. Simplified propeller design for low-powered airplanes, by Fred E. Weick.  
National Advisory Committee for Aeronautics, Jan. 1925 (mimeographed), Washington, pp. 10, ill., diagrs.
- Technical Notes No. 213. Discharge characteristics of a high speed fuel injection system, by Robertson Matthews.  
National Advisory Committee for Aeronautics, Feb. 1925 (mimeographed), Washington, pp. 21, ill., diagrs.
- Technical Notes No. 214. Note on the Katzmayer effect on airfoil drag, by Shatswell Ober.  
National Advisory Committee for Aeronautics, Feb. 1925 (mimeographed), Washington, pp. 11, ill., diagr., tabs.
- Technical Notes No. 215. The calculation of wing float displacement in single-float seaplanes, by Edward P. Warner.  
National Advisory Committee for Aeronautics, March 1925 (mimeographed), Washington, pp. 5, diagr.
- Technical Notes No. 216. The velocity distribution caused by an airplane at the points of a vertical plane containing the span, by Max. M. Munk.  
National Advisory Committee for Aeronautics, March 1925 (mimeographed), Washington, pp. 8.
- Technical Notes No. 217. Note on the air forces on a wing caused by pitching, by Max M. Munk.  
National Advisory Committee for Aeronautics, March 1925 (mimeographed), Washington, pp. 6.
- Technical Notes No. 218. The estimation of airplane performance from wind tunnel tests on conventional airplane models, by Edward P. Warner and Shatswell Ober.  
National Advisory Committee for Aeronautics, May 1925 (mimeographed), Washington, pp. 18.
- Technical Notes No. 219. The comparison of well-known and new wing sections tested in the variable density wind tunnel, by George J. Higgins.  
National Advisory Committee for Aeronautics, May 1925 (mimeographed), Washington, pp. 13, tabs., diagrs.

- NATIONAL ADVISORY COMMITTEE FOR AERONAUTICS. Technical Notes No. 220.  
The drift of an aircraft guided toward its destination by directional receiving of radio signals transmitted from the ground, by Edward P. Warner.  
National Advisory Committee for Aeronautics, June 1925 (mimeographed), Washington, pp. 5, diags.
- Technical Notes No. 221. Model tests on the economy and effectiveness of helicopter propellers, by Max M. Munk.  
National Advisory Committee for Aeronautics, July 1925 (mimeographed), Washington, pp. 26, ill., diagr., tabs.
